

## Market composition and customer statistics Report

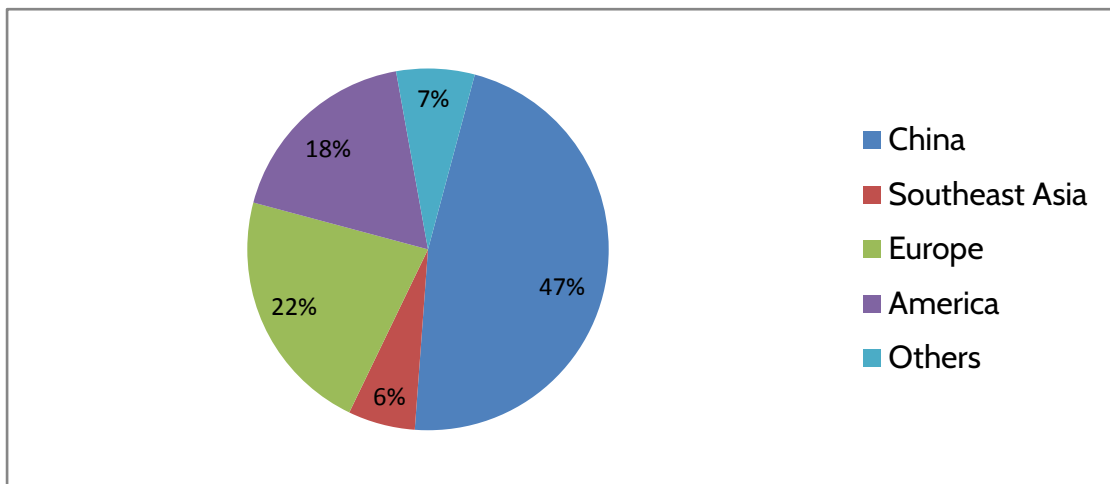

### ➤ Product Sales Proportion Chart and Customer Distribution Chart

Dolph Microwave Technology Development Ltd has long-term and stable relationship with our customers who from domestic and abroad engaged in microwave and ESA industry. We strive to support our customers through more communication, proposals and discussion.

For more knowledge about Dolph marketing understood, we produced two pie charts for introducing our products sales percentage and customers area distribution. The first one shows proportions of Dolph different products in all sales, the second one shows which areas Dolph customers located in. Please see more details in below.

Product sales proportion

Customer distribution proportion

Some of our major customers include:

- China Academy of Space Technology
- The Northwest China Research Institute of Electronic Equipment
- The 54th Research Institute of China Electronics Technology Group
- XIDIAN UNIVERSITY
- Aviation Industry Corporation of China, Ltd.
- Radio communication Technologies LLC
- New Technologies of Telecommunications---NPPNTT
- Secez Services-Strategic Electronics Defense Systems
- CONTEC Co.,Ltd.
- Studiotech Belgium
- Shwe Than Lwin Media Co., Ltd
- SMT-I Logic LLC
- Hungaro Digital Kft.
- Secez Service Co., Ltd
- Profen Communication Technologies & Services, Inc.
- TS Global Networks

➤ ***Our Product Applications***

● ***Airborne***

Depending on professional knowledge and rich experience, Dolph Microwave participates the research & production & installation of some business and military aircraft projects, we provide products such as weather routing, terrain following and electronic warfare, etc.

Major projects including amphibian plane, Xinzhou aircraft and UAV system.

- **Space**

Dolph Microwave design and manufacture relevant products, we have nearly 20 years experience on design, manufacture and testing of microwave & millimeter wave antenna & feed and the components which applied for space. Except for internal capability in material selection, manufacture and RF testing, we built long-term cooperation relationship with environment testing lab to offer the vibration & thermal vacuum & Tx environment testing for our hardware equipment.

Major projects including Shenzhou spacecraft, Tiangong laboratory, artificial sun and Beidou Navigation Satellite System.

- **Shipboard**

Dolph Microwave provides various waveguide and high power components products which support surface search & navigation & EMC radar & target lighting program of warship platform.

Major projects including submarine electronic warfare support system, artillery fire control system, countermeasure radar and missile fire control system.

● **Land**

Dolph Microwave design and manufacture traditional business and military microwave products including waveguide and components, high power distributor and combiner, and offer earth station antenna system integration service, supporting the domestic and international microwave and satellite communication application.

Major projects including CAS deep space exploration, Doppler weather radar, air traffic control tracking radar and satellite communication system.
